languages

- Russian - Native
- English - Intermediate

work experience

June 2022 - present time Dream Team LLC, Russia

Web Designer

- Created online stores, landing pages and mobile applications from scratch, including the design of the structure, UX/UI design and the implementation of adaptive solutions for different devices.
- Redesigned existing projects, conducted competitive analysis and tested the design, seeking to improve the user experience and increase conversions.
- Designed icons, illustrations and banners for content, creating unique and harmonious visual elements. Worked with the color palette, typography, and components to maintain the integrity of the design.
- Actively interacted with clients, clarified their needs and offered optimal solutions to help achieve their business goals.

February 2021 - present time FL.ru

Freelancer

- Designed icons, illustrations, email templates, and banners for web services, creating visually appealing content that meets the goals and objectives of clients. I worked on creating logos that convey the uniqueness of the brand.
- Created designs, as well as made changes to existing projects of customers, improving their appearance and functionality.
- Recently, I have been creating product cards for trading platforms, providing high visual appeal and a structured presentation of product information.
